Projects

PhotoGit | *TypeScript, Node.js, Photoshop UXP, Git, Git LFS*
- Built Git-backed version control for Photoshop: save PSD versions, branch, diff, and merge from a UXP panel
- Designed a serializer splitting PSDs into layer-level JSON, enabling conflict-free merges of parallel edits
- Architected a TypeScript monorepo (differ, merge engine, Git engine) with a local Node.js helper and CLI

Drift | *Swift, SwiftUI, macOS 14+*
- Built a privacy-first macOS focus tracker that detects attention drift by classifying active apps and browser context
- Shipped real-time window tracking, session replay, and a menu-bar widget, with all activity data kept on-device

NFASS Journal | *Next.js 14, TypeScript, Tailwind CSS, Prisma, PostgreSQL, TipTap, Vercel*
- Developed a full-stack journal platform with a JWT-secured admin workspace and Prisma/PostgreSQL persistence
- Implemented post CRUD, a TipTap rich-text editor with Markdown support, and optimized image uploads

IB History Practice Platform | *JavaScript, HTML, CSS, Vercel*
- Shipped an essay-practice site for 73 past-paper questions, adopted by ∼**100 students** in my IB cohort
